

DEBAR GLASS ADJUSTER - DBGA-001/10

We're excited to announce the launch of our latest innovation – **the Debar Glass Adjuster!** Designed for fabricators, installers, and end users, this advanced tool enables **easy adjustment of door toe and heeling** without requiring deglazing, bead removal, or gasket extraction.

The Debar Glass Adjuster is the perfect solution for **reducing after-sales site visits** while **boosting customer satisfaction**. By allowing customers to make **quick and easy adjustments**, they can save **time and money** while ensuring **optimal door performance and alignment** – **no engineer required**.

Key Benefits:

- ✓ **Easy to Use** – Designed for simple, straightforward adjustments.
- ✓ **Cost-Effective** – Eliminates the need for professional engineer call-outs.
- ✓ **Enhanced Customer Experience** – End users can quickly resolve alignment issues, improving overall satisfaction.
- ✓ **Improved Performance** – Ensures that doors remain perfectly aligned for smooth operation and increased longevity of the hardware.
- ✓ **Fits All Systems** - We offer a range of screw sizes to fit all systems.

This is a must-have tool for anyone looking to **simplify door maintenance and improve efficiency!**

Glass Adjuster – The Simple Fix for Dropped Doors!

Picture this: Your customer calls in, frustrated because their doors have dropped. In the past, you would have to send out a service engineer—maybe even a two-person fitting team—costing hundreds of pounds and valuable time. Worse yet, you might not be able to schedule a visit that same week, leaving your customer waiting and their security at risk.

But with the Glass Adjuster, the solution is instant.

Now, all it takes is a quick call. Simply **guide your customer** through the easy adjustment process, and they can fix their doors themselves—**no service call, no downtime, no extra costs**.

Why Choose the Debar Glass Adjuster?

- ✓ **Time Saved** – No need to schedule an engineer.
- ✓ **Money Saved** – Keep your fitting teams on new jobs.
- ✓ **Customer Satisfaction** – Instant fix and peace of mind.

 **Glass Adjuster – The Smarter Way to Service!**

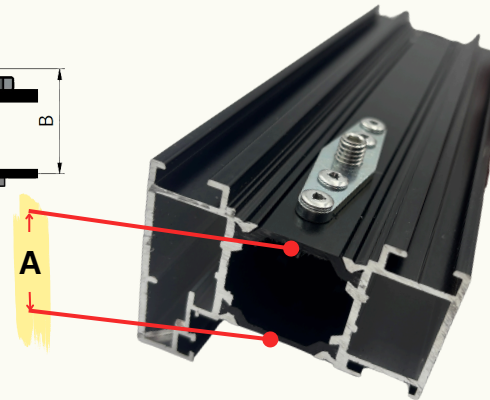

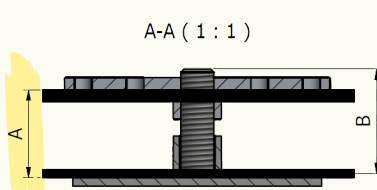

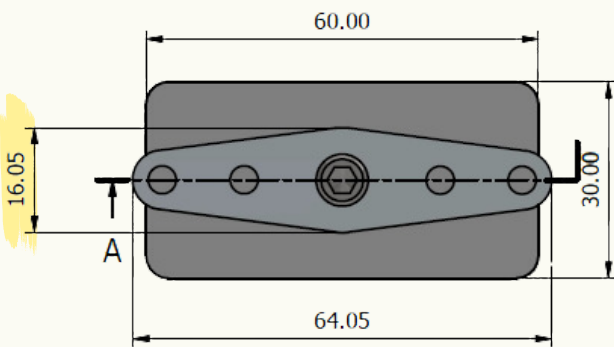

How to Determine the Right Size

We have a range of **size screws** to fit all systems. When determining which code you require there are **two key measurements** to take into consideration.

1. Width of your polyamide - the glass adjuster is **16mm wide** and would need to sit flat on the top of the profile.

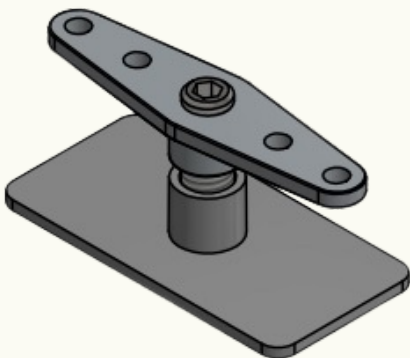

2. Polyamides - Measurement 'A' - Measure the **gap between the two polyamides**. Refer to the table below to determine the correct **SKU Code**.

What to Order.

There are 2 parts to the glass adjuster: the adjuster and the screw. Both are sold in packs of 10.

Part 1 - DBGA-001/10

Part 2 - Match Measurement A to SKU Code Below

Measurement 'A'	Size Screw	SKU
22 - 26mm	30mm	DBS-GA-30mm/10
27 - 31mm	35mm	DBS-GA-35MM/10
32 - 36mm	40mm	DBS-GA-40MM/10
37 - 41mm	45mm	DBS-GA-45MM/10
41 - 46mm	50mm	DBS-GA-50MM/10
